

AS009 ACCURATE SAFETY FORMWORK CLAMP (H20)®

The **Accurate Safety Formwork Clamp (H20)®** can be used any H20 formwork beam.

The easy to use twist design allows the clamp to be installed from above at any point on the beam and is quickly secured in place using the built-in clamp or through the pre-defined screw/nail holes.

The clamp is used with the **Accurate Safety Formwork Post®** to give a variable height system to suit primary or secondary beam depths.

The **Accurate Safety Formwork Clamp (H20)®** is hot-dip galvanised for a long life.

KEY FACTS
